

Modern Networks provides a complete Business Broadband package including a pre-configured router and micro-filter. Our Business Broadband services deliver high quality, affordable broadband with fast download speeds "up to 330Mbps" depending on your telephone line and location.

Our Business Broadband services come with a static IP, which means you can access your computer from anywhere, host a website, run a server, setup your own email, operate CCTV and make better use of Internet telephony services.

Types of service available:

- Standard broadband (ADSL)
- Fibre-to-the-cabinet broadband (FTTC)
- Fibre-to-the-premises broadband (FTTP)

Delivery

Contact a member of the sales team who will be happy to quote you for this service.

Terms of Service

Monthly subscription fee. Minimum 5 working days for delivery. Optional extras include fully managed hardware, additional IP addresses and firewalls.

The service is dependent on network coverage availability. Resilient connectivity available.
