

Modern Networks Endpoint Protection helps protect your computers from malware and other threats as they appear. Using a combination of advanced detection techniques and powerful Cloud-based threat intelligence data, the software is continually updating as threats evolve.

Modern Networks Endpoint Protection delivers a complete, high-performance endpoint malware prevention and management solution. Easily deployed in seconds, it is always up-to-date with the latest threat intelligence, Cloud-based management tools, and even protects your devices when they are off the network.
