

# 4G Rapid Deployment Service

**4G Rapid Deployment Service is the perfect temporary solution for any business that needs immediate Internet access to email and basic systems while waiting for fixed line broadband to be installed.**

Our next day, plug-and-play solution provides fast, reliable, secure 4G wireless and mobile broadband with 30GB data allowance. Once your business broadband is installed, simply return the router to us.

## Delivery

Please contact a member of the sales team to quote for this service. Next business day delivery. The router is pre-configured and ready to use out-of-the-box.

## Terms of service

The service is only available in the UK.

The service is available on a 30-day contract.

The router must be installed in a good location for 4G signal from O2 and be able to connect to the local network.

The service is typically suitable for up to five users.

The service is not suitable for high bandwidth applications like CCTV and video streaming.
