Cloud Connect DR

SERVICE SUMMARY

Ensure your data is always available and fully protected no matter where it resides. When you replicate your virtual IT infrastructure via Veeam Cloud Connect DR, you no longer have to worry about hardware failures, cyber threats, such as ransomware, or accidental deletions. Simply recover your infrastructure within minutes and have it running in a resilient data centre whilst you restore your downed production services.

KEY BENEFITS

- Fast, flexible failover with just a few clicks
- Reliable running in a tier-3 ISO 27001 certified data centre
- Secure replication over SSL/TLS connections using a single port
- Bandwidth friendly for limited internet connections
- Out-of-hours support for business-critical incidents.

VALUE STATEMENT

Your IT infrastructure is like the plumbing – you only notice it when it stops working. However, even short periods of unexpected downtime can have extremely negative business consequences including lost productivity, lost revenue, lost customers and lost market share. That is why it is vital to have a disaster recovery solution that meets your business needs. Modern Networks DR provides a fast, flexible, hassle-free solution which you can trust to minimise the impact should disaster strike.

- Meet business RPO and RTO objectives
- Rapidly failover critical business structure within minutes
- Zero data loss on failbacks
- Monthly subscription-based solution is very cost effective.
