

Compute Platform

SERVICE SUMMARY

Reduce your IT infrastructure costs by moving to the Modern Networks private Cloud. Our private Cloud ensures leaner, faster, safer, cheaper, and more productive IT systems. Forget high upfront hardware costs, move to our low-cost virtual infrastructure where you only pay for what you use. Unlock secure, flexible access to practically limitless IT resources allowing you to meet all your business, legal, and compliance needs while cutting wasteful spending.

KEY BENEFITS

- Highly resilient platform located in tier 3 data centre
- Cost effective and scalable solution
- Enhanced security and data protection
- Fully managed snapshot onsite and offsite backups
- Fully managed Cloud hosted router providing dedicated network services.

VALUE STATEMENT

Our private Cloud provides you with scalable computing power, while minimizing IT requirements and physical data storage, delivering significant savings. Keep your business running by migrating to a reliable service provider who adheres to contractual SLA uptime agreements. Shift your IT focus to meet business needs, rather than just managing and maintaining infrastructure. Modern Networks provides a range of compute, power, storage, and networking resources tailored to your requirements.

- Lower up-front IT infrastructure costs
- Shift IT focus to meet business needs
- Scale services up or down based on business requirements.
