

Fibre Internet

SERVICE SUMMARY

Modern Networks' fibre internet offers business connectivity, which is fast, reliable, and secure. Whether you are a small start-up that requires cost effective internet for email access and Web browsing or a large enterprise with many users who transfer lots of data, Modern Networks has a solution. We offer you dedicated internet services which will provide guaranteed bandwidth 24/7/365 so you can always rely on stable and consistent speeds to your business. Our internet services support your crucial business connectivity requirements whatever they may be.

KEY BENEFITS

- Cost-effective and fully supported internet solutions
- Dedicated leased line to your business
- Unmetered internet with no consumption charges
- 24/7/365 monitoring and support.

VALUE STATEMENT

High speed internet has increasingly transformed the way people work. Fast, reliable business internet can accelerate business operations, enhance productivity, and enable effective communications. Business reliance on internet services only continues to grow as Cloud-based solutions increase in popularity. Therefore, an internet connection failure can be catastrophic to a business, exposing it to the risks of lost revenue, reduced productivity, poor customer service, and reputational damage. At Modern Networks, we ensure that you have the right internet service in place to maximise workplace productivity and mitigate the risk of an unexpected outage.

- Internet services with 99.5% uptime SLA
- Onsite and remote support
- Flexible service contracts
- Scalable internet solutions.
