

Could Your Building Keep Running?

A quick resilience check for property owners, managing agents and facilities teams.

Choose one answer for each question

Select **YES** only if you are confident of the answer otherwise tick **Not Sure**.

1

Do you know who has access to your critical systems?

Include suppliers with remote access to building, security or connectivity services.

Yes

☐

Not Sure

☐

2

Do you know how you would keep essential services running?

Consider building access, CCTV, connectivity and tenant-facing services.

Yes

☐

Not Sure

☐

3

Do you know how quickly you could recover from disruption?

Your answer should be based on a tested plan, rather than an assumption.

Yes

☐

Not Sure

☐

What your answers mean

If you answered YES to all three questions then you have a good foundation. Keep reviewing and testing your cyber resilience.

If you answered NOT SURE to any of the questions there might be hidden operational risks that need reviewing.

Not sure? [CLICK HERE](#) to Request a Property Cyber Resilience Review.

A practical conversation about keeping buildings, services and occupants operational.
